User
- firstName: string
- lastName: string
- email: string
- hashedPassword: string
PasswordResetToken
- tokenHash: string
- expiresAt: LocalDateTime
- usedAt: LocalDateTime
+ isActive(): bool
+ isUsed(): bool
+ markUsed(): void
Il token vale un'ora dalla sua creazione. Il sistema calcola expiresAt come l'ora della richiesta più un'ora. Dopo questo limite, isValid() restituisce false.
PTAssignment
